DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, and 19-24, are drawn to optical position sensor, classified in class 73, subclass 800.
 - II. Claims 15-18, are drawn to memory read/write arm servo control system using optics, classified in generally in class 395, subclass 425.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a memory means with servo system and optical means can use other kinds of optical means and does not generally needs all the specification of a position sensor as claimed in claims of Group I. The subcombination has separate utility such as utilization of an exact positioning means for non-memory related applications such as precise testing and measuring devices.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and the search required for

each Group is not generally required for other Groups, restriction for examination purposes as indicated is proper.

4. Applicants are advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

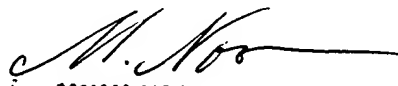

5. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (703) 308-5248. The examiner can normally be reached on Monday-Friday from 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rich Chilcot, can be reached on (703) 305-4716. The fax number for this group is (703) 308-7382.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-4900.
